CIMA
WHEREVER YOU COUNT

InLane is a **CIMA** solution for front-end automated cash desk. This modular line has a compact and elegant design, and consists of InLane 300, InLane 300 depo, InLane Kiosk.

InLane 300 DEPO accepts, authenticate and stores banknotes and coins very rapidly. It features **3 RSM** with a capacity up to 100 notes each, **8 coin hoppers** and an **overflow cassette up to 350 banknotes.**

InLane300 DEPO combines the features of the **InLane300** with an 8mm safe that allows the storage of **1,500 additional notes** into a bag placed in the device safe, and up to **18 kg of coins** into a second bag. **Both bags can be collected by the CIT.** Thanks to the high storage capacity, it adapts to any market needs, from small store size to supermarket & hypermarkets.

InLane300 DEPO can be connected via software to CIMA's back office devices.

- **Automated cash handling**
- **Elimination of the risk of errors or shortages**
- **Increased productivity due to time recovery**
- **Increased customer satisfaction**
- **Maximum hygiene: the staff does not touch the cash**
- **Easy to combine with the store design**
- **High-level recognition validator**
- **User-friendly**
- **High recycling capacity**
- **Connection with CIT companies**
- **Easy to integrate with every cash management system**
- **Controlled remotely**
- **CIMA's back-office software integration**
