CIMA
WHEREVER YOU COUNT

InLane300

SMALL FRONT OFFICE SOLUTION

InLane is the CIMA solution for front-end automated cash desk. This modular line has a compact and elegant design, and consists of InLane 300, InLane 300 depo, InLane Kiosk.

InLane 300 allows the automation of cash handling at the checkout point and it can be configured both as self-checkout (the client picks the products and the proceed to the payment by inserting the notes and/or coins and receiving back any change) and as a device for the store staff (in this case, the process is carried out by the operator and the client directly inserts and/or withdraws the coins/notes). In both cases, the operator does not touch the cash, therefore the device is perfectly suitable for those stores where a high level of hygiene is required (bakeries, butcheries, C-stores, bars...)

InLane300

SMALL FRONT OFFICE SOLUTION

- Automated cash handling
- Elimination of the risk of errors or shortages
- Increased staff productivity / time recovery
- Increased customer satisfaction
- Hygiene and safety: the store staff does not touch the cash
- Easy to combine with the store design
- Cutting-edge validator
- User-friendly
- High recycling capacity
- Connection with CIT companies
- CIMA's back-office software integration

InLane300: DESIGNED FOR YOU
